# Menu Boards

by Industry Weapon
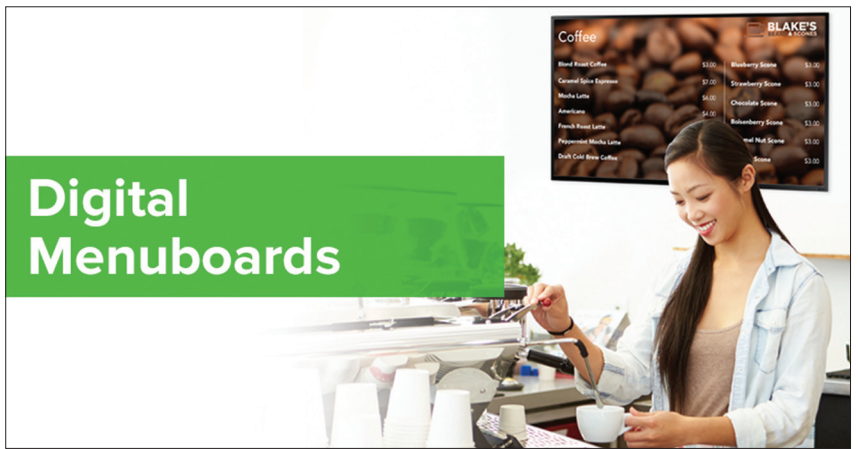

## Custom Digital Menu Boards right from your POS data!

Digital menus are an entertaining and efficient way to showcase the latest offerings in your restaurant, coffee shop, auto dealer, or service desk. By integrating directly with Clover, our app provides you with a true hands-off digital signage experience! Our app is perfect for everyone from mom and pop shops to large venues with hundreds of displays!

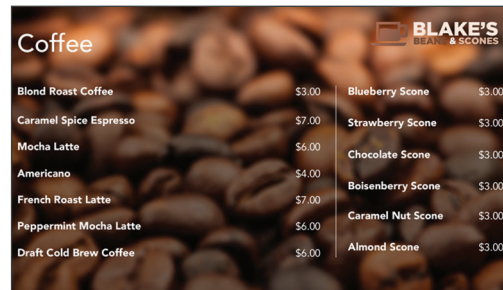

Our interface connects directly with Clover's API and allows users to select menu items to be displayed on their digital menu boards

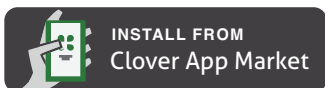

Users are then able to select from various digital menu board styles and templates
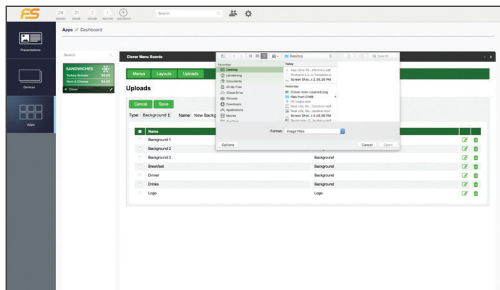

Further customization options allow users to upload their own custom background image and logo to fine tune their digital menu boards

When finished, the user's selections are quickly and easily pushed to their digital menu boards
